2021 **Javascript Algorithms & Data Structures**
FreeCodeCamp

2021 **The Complete Web Developer**
Udemy

2020 **Responsive Web Design**
FreeCodeCamp

EXPERIENCE

2024 **Secret Source SL**
Frontend Developer | *Supply Pilot*

- Collaborating with a team of developers on enhancing the onboarding and registration processes for suppliers and retailers.
- Developing and maintaining a multi-tenant application for brand owners and suppliers to collect, share, and engage around product data using NodeJS, React, Typescript and Azure with SQL database.
- Implementing new features to improve supplier engagement and data collection efficiency.
- Ensuring high performance and responsiveness of the web application.
- Contributing to both frontend and backend development, debugging, and testing.

2024 – 2023 **Secret Source SL**
Frontend Developer | *ASDA*

- Focused on the frontend using React with TypeScript.
- Collaborated with a backend developer to integrate the frontend with a Dockerised PHP/Laravel backend and SQL database.
- Implemented REST operations, data export/import features, search and filtering functionalities, and frontend-backend communication with Inertia.js.
- Managed UX/UI design, following the style guide to align with the brand.
- Delivered the project on time, achieving improved performance and UX compared to the previous system.

2023 – 2022 **Secret Source SL**
Junior Frontend Developer | *Elanco*

- Developed components and features leveraging React, TypeScript, NextJS, TailwindCSS, Storybook, and Kontent.ai's CMS.
- Facilitated the migration of over 100 websites from Drupal to NextJS with Kontent.ai's Headless CMS, enhancing user experiences across diverse devices.
- Actively participated in Agile methodologies, ensuring timely project delivery while troubleshooting and resolving complex bugs.
- Maintained coding standards, contributed to documentation, and onboarded new developers, fostering team growth and cohesion.
